ASSUME ANY POSITION...

You can forget about a conveyor graveyard with the Fleming Plastics Dynamics DynaCon modular conveyor system. Fleming Plastics Dynamics DynaCon modular conveyor system can be re-configured in minutes, to suit ever-changing manufacturing or workflow environments. Made from high-impact plastic, this modular conveyor system offers flexibility for many applications including assembly, plastics, packaging, clean room and electronics.

- No ongoing maintenance
- Customised to suit your individual requirement
- Constructed in glass filled polycarbonate for industrial strength while remaining light weight
- Fully tracked Intralox belting eliminates the need to ever track the belt
- Damaged belting can be replaced in sections as the belt is also modular
- Modular design allows re-configuration with minimum down time to suit changing demands
- Low cost external motor & gearbox combination for easy maintenance
- Industrial leg supports with height adjustment
- Any individual component can be replaced at low cost if damaged
