

WATER BATH CONVEYOR

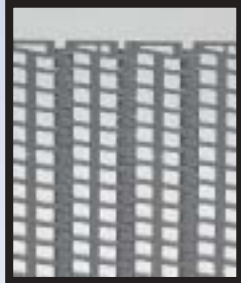

PERFECT FOR WATER BATH AND WASHDOWN APPLICATIONS.

This standard-sized corrosion- and rust-resistant DynaCon Modular Conveyor System lets you add water bath and washdown applications without requiring expensive custom conveyor sections. The feed end of the conveyor is submerged in a water tank. Parts are directed into the water tank where they are cooled and carried out via the externally-powered incline.

WATER BATH BELTING

Flush Grid Belting

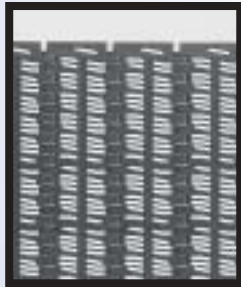

38% open area

Made of polypropylene, polyethylene and acetal.

Heavier duty belt for larger parts, allows maximum drainage.

Mesh Top Belting

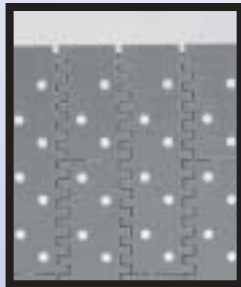

24% open area

Polypropylene and polyethylene construction.

Excellent drainage/transport of medium-sized parts.

Perforated Top Belting

6.4% open area

Made from polypropylene, polyethylene, acetal and nylon.

Ideal for smaller parts.
